Contents of Volume 84

Number 1, 7 May 1980

EDITORIAL, Short Articles on Unsolved Problems 1

PARNAS, H. and SEGEL, L. A., A Theoretical Explanation for Some Effects of Calcium on the Facilitation of Neurotransmitter Release 3

RYAN, J. P., Information–Entropy Interfaces and Different Levels of Biological Organization 31

GROSSMAN, Z., ASOFSKY, R. and DELISI, C., The Dynamics of Antibody Secreting Cell Production: Regulation of Growth and Oscillations in the Response to T-Independent Antigens . . 49

SELTEN, R., A Note on Evolutionarily Stable Strategies in Asymmetric Animal Conflicts 93

BAHRAMIAN, M. B., How Bacterial Ribosomes Select Translation Initiation Sites 103

MACHLUP, S. and SLUCKIN, T. J., Driven Oscillations of a Limit-cycle Oscillator 119

SAUNDERS, K. B., BALI, H. N. and CARSON, E. R., A Breathing Model of the Respiratory System: The Controlled System . . 135

SAUNDERS, K. B., Oscillations of Arterial CO_2 Tension in a Respiratory Model: Some Implications for the Control of Breathing in Exercise 163

Number 2, 21 May 1980

LAPPIN, S. A. and MAPRESS, F. H., Proton Turnover at Mitochondrial Coupling Sites 181

HALSEY, Y. D., Water and its Ions: Mass Action Control of Reaction Rates in Lipid–Protein Membranes 185

CUNNINGHAM, A. and NISBET, R. M., Time Lag and Co-operativity in the Transient Growth Dynamics of Microalgae 189

CHALKER, B. E., Modelling Light Saturation Curves for Photosynthesis: An Exponential Function 205

KÜHNAU, R. and LASCH, J., An Analytical Solution to the Evolution of Presteady State Substrate and Product Concentration Profiles in Spherical Enzyme Supports 217

ADAM, G., Population-dynamical Model of Cell-density Dependent Growth Regulation and Aging of Fibroblasts *in Vitro* . . . 233

LEE, S. B. and RYU, D. D. Y., External Diffusion Effects on the Kinetic Constants of Immobilized Enzyme Systems . . . 259

PETERSON, E. L., A Limit Cycle Interpretation of a Mosquito Circadian Oscillator 281

CHANDLER, H. D. and HEPBURN, H. R., The Analysis of Globular Proteins as Defect Containing Cylindrical Crystals . . . 311

FARES, Y., SHARPE, P. J. H. and MAGNUSON, C. E. Pheromone Dispersion in Forests 335

FELL, D. A., Theoretical Analysis of the Functioning of the High- and Low-K_m Cyclic Nucleotide Phosphodiesterases in the Regulation of the Concentration of Adenosine 3′,5′-Cyclic Monophosphate in Animal Cells 361

KASTRIKIN, N. F., Force Generation and ATP Hydrolysis in Muscle Contraction 387

Number 3, 7 June 1980

REID, R. E. and HODGES, R. S., Co-operativity and Calcium/Magnesium Binding to Troponin C and Muscle Calcium Binding Parvalbumin: An Hypothesis 401

PARKER, G. A. and KNOWLTON, N., The Evolution of Territory Size—Some ESS Models 445

DEAK, I. I., A Model Linding Segmentation, Compartmentalization and Regeneration in *Drosophila* Development 477

GRÄSBECK, R. and KOUVONEN, I., Pseudo-oligomer Formation Between Related Soluble and Membrane-bound Proteins. Implications on the Attachment of Proteins to Receptors and Membranes and the Evolution of Transport Proteins . . . 505

FISCHER, K. M., Rapid Evolution and Histocompatability Antigen Function 513

CALLEJA, G. B., ZUKER, M., JOHNSON, B. F. and YOO, B. Y., Analyses of Fission Scars as Permanent Records of Cell Division in *Schizosaccharomyces pombe* 523

IWASA, Y. and TERAMOTO, E., A Criterion of Life History Evolution Based on Density Dependent Selection 545

TREISMAN, M. and COLLINS, J. S., Prior Fitness and the Evolutionarily Stable Strategy for Intraspecific Conflict 567

HONDA, H. and EGUCHI, G., How Much Does the Cell Boundary Contract in a Monolayered Cell Sheet? 575

Number 4, 21 June 1980

JAFFE, K., Theoretical Analysis of the Communication System for Chemical Mass Recruitment in Ants 589

BUNOW, B., Cellular Enzymology: The Steady-state Kinetics of Compartmentalized Enzymes 611

BUNOW, B., KERNEVEZ, J.-P., JOLY, G. and THOMAS, D., Pattern Formation by Reaction–Diffusion Instabilities: Application to Morphogenesis in *Drosophila* 629

DAY, R., MARTINO, F. and LADIK, J., Model Calculation on DNA–Protein Interaction 651

CHARLESWORTH, B., The Cost of Sex in Relation to Mating System 655

MATELA, R. J. and FLETTERICK, R. J., Computer Simulation of Cellular Self-sorting: A Topological Exchange Model . . 673

HORIIKE, K. and MCCORMICK, D. B., Effect of Ligand on Chemical Modification of Proteins. Graphical Determinations of Dissociation Constant and Number of Essential Residues Affected by Ligand Binding 691

DOŁOWY, K. and GODLEWSKI, Z., Computation of the Erythrocyte Cell Membrane Parameters from Electrophoretical and Biochemical Data: Stern-like Electrochemical Model of the Cell Membrane 709

PROTHERO, J., Control of Stem Cell Proliferation: A Density-dependent Commitment Model 725

GADGIL, S., NANJUNDIAH, V. and GADGIL, M., On Evolutionary Stable Compositions of Populations of Interacting Genotypes 737

FUERST, J. A., Bacterial Sheathed Flagella and the Rotary Motor Model for the Mechanism of Bacterial Motility 761

ROSIN, R., Paradoxes of the Honey-bee "Dance Language" Hypothesis 775

Index to Volume 84

ADAM, G., Population-dynamical model of cell-density dependent growth regulation and aging of fibroblasts *in vitro*, 233

Adenosine 3′,5′-cyclic monophosphate in animal cells, theoretical analysis of the functioning of the high- and low-K_m cyclic nucleotide phosphodiesterases in the regulation of, 361

Aging of fibroblasts *in vitro*, population-dynamical model of cell-density dependent growth regulation and, 233

Animal cells, theoretical analysis of the functioning of the high- and low-K_m cyclic nucleotide phosphodiesterases in the regulation of the concentration of adenosine 3′,5′-cyclic monophosphate in, 361

Animal conflicts, asymmetric, a note on evolutionarily stable strategies in 93

Antibody secreting cell production, the dynamics of; regulation of growth and oscillations in the response to T-independent antigens, 49

Antigen function, histocompatibility, rapid evolution and, 513

Ants, theoretical analysis of the communication system for chemical mass recruitment in, 589

Aromatic residues, are they essential at the "active sites" of peptide hormones?, 457

ASOFSKY, R. (see GROSSMAN, Z.), 49

ATP hydrolysis and force generation in muscle contraction, 387

Bacterial ribosomes, how they select translation initiation sites, 103

Bacterial sheathed flagella and the rotary motor model for the mechanism of bacterial motility, 761

BAHRAMIAN, M. B., How bacterial ribosomes select translation initiation sites, 103

BALI, H. N. (see SAUNDERS, K. B.), 135

Biological organization, information-entropy interfaces and different levels of, 31

Breathing in exercise, some implications for the control of; oscillations of arterial CO_2 tension in a respiratory model, 163

Breathing model of the respiratory system: the controlled system, 135

BUNOW, B., Cellular enzymology: the steady-state kinetics of compartmentalized enzymes, 611

BUNOW, B., KERNEVEZ, J.-P., JOLY, G. and THOMAS, D., Pattern formation by reaction-diffusion instabilities: application to morphogenesis in *Drosophila*, 629

Calcium effects on the facilitation of neurotransmitter release, a theoretical explanation for, 3

Calcium/magnesium binding to troponin C and muscle calcium binding parvalbumin, co-operativity and; an hypothesis, 401

CALLEJA, G. B., ZUKER, M., JOHNSON, B. F. and YOO, B. Y., Analyses of fission scars as permanent records of cell division in *Schizosaccharomyces pombe*, 523

CARSON, E. R. (see SAUNDERS, K. B.), 135

Cell boundary, how much does it contract in a monolayered cell sheet?, 575

Cell division in *Schizosaccharomyces pombe*, analyses of fission scars as permanent records of, 523
Cell membrane, Stern-like electrochemical model of; computation of the erythrocyte cell membrane parameters from electrophoretical and biochemical data, 709
Cell proliferation, control of stem; a density-dependent commitment model, 725
Cell-density dependent growth regulation and aging of fibroblasts *in vitro*, population-dynamical model of, 233
Cellular enzymology: the steady-stake kinetics of compartmentalized enzymes, 611
Cellular self-sorting, computer simulation of; a topological exchange model, 673
CHALKER, B. E., Modelling light saturation curves for photosynthesis: an exponential function, 205
CHANDLER, H. D. and HEPBURN, H. R., The analysis of globular proteins as defect containing cylindrical crystals, 311
CHARLESWORTH, B., The cost of sex in relation to mating system, 655
Circadian oscillator, mosquito, a limit cycle interpretation of, 281
CO_2 tension, arterial, in a respiratory model, oscillations of; some implications for the control of breathing in exercise, 163
COLLINS, J. S. (see TREISMAN, M.), 567
Communication system for chemical mass recruitment in ants, theoretical analysis of, 589
Computer simulation of cellular self-sorting: a topological exchange model, 673
Conflicts, asymmetric animal, a note on evolutionarily stable strategies in, 93
Conformational switch in 5S RNA during protein synthesis, a general model for (letter), 369
Co-operative response of chemically excitable membrane: three state model, 131
Co-operativity and calcium/magnesium binding to troponin C and muscle calcium binding parvalbumin: an hypothesis, 401
Co-operativity and time lag in the transient growth dynamics of microalgae, 189
Coupling sites, mitochondrial, proton turnover at, 181
CUNNINGHAM, A. and NISBET, R. M., Time lag and co-operativity in the transient growth dynamics of microalgae, 189
Cyclic nucleotide phosphodiesterases, high- and low-K_m, theoretical analysis of its functioning in the regulation of the concentration of adenosine 3′,5′-cyclic monophosphate in animal cells, 361

DAY, R., MARTINO, F. and LADIK, J., Model calculation on DNA-protein interaction, 651
DEAK, I. I., A model linking segmentation, compartmentalization and regeneration in *Drosophila* development, 477
Defect containing cylindrical crystals, the analysis of globular proteins as, 311
DELISI, C. (see GROSSMAN, Z.), 49
Density dependent selection, a criterion of life history evolution based on, 545
Diffusion effects, external, on the kinetic constants of immobilized enzyme systems, 259
DNA–protein interaction, model calculation, on 651
DOŁOWY, K. and GODLEWSKI, Z., Computation of the erythrocyte cell membrane parameters from electrophoretical and biochemical data: Stern-like electrochemical model of the cell membrane, 709

Drosophila development, a model linking segmentation, compartmentalization and regeneration, 477
Drosophila, pattern formation by reaction-diffusion instabilities: application to morphogenesis in, 629

EDITORIAL, Short articles on unsolved problems, 1
EGUCHI, G. (see HONDA, H.), 575
Entropy-information interfaces and different levels of biological organization, 31
Enzyme supports, spherical, an analytical solution to the evolution of presteady state substrates and product concentration profiles in, 217
Enzyme systems, immobilized, external diffusion effects on the kinetic constants of, 259
Enzymology, cellular: the steady-state kinetics of compartmentalized enzymes, 611
Erythrocyte cell membrane parameter computation from electrophoretical and biochemical data: Stern-like electrochemical model of the cell membrane, 709
ESS models of the evolution of territory size, 445
Evolution of presteady state substrate and product concentration profiles in spherical enzyme supports, an analytical solution to, 217
Evolution of territory size—some ESS models, 445
Evolution of transport proteins, implications on the attachment of proteins to receptors and membranes and the; Pseudo-oligomer formation between related soluble and membrane-bound proteins, 505
Evolution, rapid, and histocompatibility antigen function, 513
Evolutionarily stable strategy for intraspecific conflict, prior fitness and, 567
Evolutionarily stable strategies in asymmetric animal conflicts, a note on, 93
Evolutionary stable compositions of populations of interacting genotypes, 737
Exercise, some implications for the control of breathing in; oscillations of arterial CO_2 tension in a respiratory model, 163
